UNOPS-LTA

Supplier to UNOPS – LTA
Delivering Sustainable Infrastructure
and Services

The United Nations Office for Project Services (UNOPS) is one of the UN's specialized arm for delivering complex development, humanitarian and climate-resilience projects. It supports governments and partners with end-to-end solutions in infrastructure, procurement and project management — from design and tendering to construction and operation. With its strong focus on transparency, quality and sustainability, UNOPS is a natural partner for scalable, high-impact energy solutions.

PRODUCT LINE

SOLON Ultra5

Mission-Ready 5 kWp Hybrid Solar System

- Integrated hybrid inverter with 30 kWh energy storage
- Turnkey, rapid-deployment solution — tool-free setup, operational in under 1 hour
- Designed for emergency and first-response use: medical units, clinics, shelters, vaccination and triage sites
- Supports critical telecom, lighting, and essential IT loads
- Provides reliable 24/7 power for low-to moderate-demand applications
- Optimized for short-term and mobile mission deployments

SOLON Ultra10

Pre-Integrated 10 kWp Hybrid Solar System

- Integrated hybrid inverter with 60 kWh energy storage
- Portable, semi-mobile clean-power system for field and remote deployments
- Suitable for field offices, clinics, laboratories, monitoring stations, training centres, and temporary camps
- Commissioning in under 2 hours
- Balanced mobility and higher energy output with 24/7 autonomy
- Supports continuous daytime and evening loads
- Designed for weeks-to-months operational deployments

SOLON Ultra15

Compact 15 kWp Hybrid Solar Solution

- Integrated hybrid inverter with 70 kWh energy storage
- Modular, scalable system designed for extended and multi-site deployments
- Suitable for community electrification, research and monitoring sites, education centres, and multi-facility compounds
- Operational in under 2 hours
- Engineered for sustained 24/7 higher-demand operations
- Optimized for long-term and evolving mission profiles
